Fall Archery Season

Such turkeys may be taken only by longbow (including compound bow); without the use of dogs, bait, recorded calls or live decoys; from one-half (½) hour before sunrise to sunset in all counties except: Bates, Cass, Clay, Clinton, Daviess, Dunklin, Greene,

The report must include the hunter's name and address, the county where the turkey was taken, and the date taken.

An archer, while in the act of pursuing or hunting turkey on an archer's permit, shall not have a firearm on his person.

General

A farmer as defined below may, without holding a turkey hunting permit, take and possess turkey in accordance with this rule on his farm, but he shall tag such turkey with his name and address and the date immediately upon taking and shall personally deliver such turkey for checking during the firearms seasons and, during the archery season, shall report such taking by letter or postcard, as required herein.

A farmer is defined as follows: Any Missouri resident who is an owner of lands he personally and physically operates primarily for agricultural purposes, the lessee or operator residing on such lands, or any member of the immediate household of such owner-operator or resident lessee or operator.

This definition is intended to separate those who truly farm the land from those who own the land for other purposes. Farmers are not required to reside on their land to qualify under this definition, however, lessees or operators of land they do not own must reside on the land they lease or operate before they or members of their immediate household can qualify under the farmer definition.

Any person who kills or injures any wild turkey shall make a reasonable effort to retrieve such turkey and include it in his season limit.
